I am a second-semester Software Engineering student at IDN Polytechnic with a strong passion for frontend development—both web and mobile. I enjoy crafting clean, interactive interfaces and enhancing user experience through thoughtful design. While I work on both platforms, I'm more focused on mobile using Flutter, and on the web, I often use Tailwind CSS. I also have soft skills such as problem-solving, teamwork, and a deep interest in UI/UX design, staying updated with the latest tech trends.

WORK EXPERIENCE

Backend developer, PT Mutazak   **Apr 2024 - May 2024**
- Create a review system on the web
- Create a dashboard that can manage web views

Fullstack developer, National Research and Innovation Agency - intern   **Aug 2023 - Feb 2024**
- Create and designing a brin book database.
- Create a dashboard to make it easier for employees to manage information on their Brin book collection.
- Create an interactive graph that can be configured to display any desired year.

EDUCATION

IDN Polytechnic - software engineering.   **July 2024 - Present**

Over the past two semesters at IDN Polytechnic, I've been an active member of the Student Executive Board (BEM). I first served in the Talent and Interest division, organizing competitions and events, and now serve as Vice President. This experience has strengthened my communication, teamwork, and event coordination skills. Technically, I've gained practical programming experience through projects such as:
- Education app using Flutter
- Ticketing app with Laravel and Flutter
- Medium-style blog using Laravel
- Portfolio website with Tailwind CSS

Taruna Bhakti Vocational High School - software engineering   **July 2021 - June 2024**

During my time in vocational high school, I was selected as a Behavior Change Ambassador and actively participated in learning activities. I also completed several projects, including:
- Developed a student violation reporting system
- Created a "KitKat" website project
- Built a counseling appointment system with school counselors
- Designed a digital book repository
- Created a photo-sharing app similar to Instagram

SKILL

- HTML
- CSS
- PHP
- Java Script
- Laravel
- Flutter
- Tailwind CSS
- Bootstrap
- Mysql
- Api

ADDITIONAL INFORMATION

- **Languages:** Indonesian, English.
- **Certifications:** IT Specialist Databases - Certiport, Responsive Web Design - Freecodecamp.
